PROFESSIONAL SUMMARY

Full-Stack Developer and AI Product Builder who ships complete, production-ready digital products — from intelligent SaaS platforms and healthcare systems to agri-tech marketplaces — backed by sharp graphic design and a visual identity instinct that most engineers don't have. I don't just write code; I design the experience, build the system, and make it look like a funded product.

Certified as an Azure AI Engineer Associate (AI-102) and AWS AI Practitioner, with further credentials from DataCamp, Digital Skills Nigeria, and the Microsoft-backed AI Developers Program under the Federal Government of Nigeria's NITDA/3MTT initiative — spanning AI engineering, cloud intelligence, and software development. A growing portfolio of deployed applications spans healthcare, agri-tech, education, and civic sectors. Currently pursuing a B.Tech in Computer Science at NUTM, Lagos, while building real tools for real users.

WORK EXPERIENCE

Graphics Designer | Social Media Manager | Full-Stack Developer

SMART HUB AGRONEXUS – Lagos, Nigeria

December 2025 – Present

- Built and deployed full-stack web applications for agri-tech operations, including client-facing platforms with user authentication, product listings, and live dashboards — reducing time-to-launch for internal digital products.
- Developed corporate brand assets, product visuals, pitch materials, and digital communication collateral.
- Managed cross-platform social media content strategy, calendar, and execution across LinkedIn, Instagram, and X.

- Introduced AI workflow automation into the content production pipeline, cutting asset turnaround time and enabling the team to scale output without increasing headcount.
- Elevated company's investor-facing digital presence by overhauling brand assets and online touchpoints, contributing to improved pitch readiness and client engagement.

Graphics Designer & Media Manager

Streams of Life Nation - Lagos, Nigeria

January 2025 – Present

- Designed visual assets for services, events, and social media, maintaining consistent brand identity and messaging.
- Created motion graphics, announcement slides, and livestream overlays to enhance church broadcasts and digital outreach.
- Developed and executed a unified visual content strategy across physical and digital platforms, ensuring consistent brand identity and measurably improving audience engagement during live and online services.
- Operated live broadcast visuals and digital asset transitions in real time, maintaining zero-error production quality across weekly services reaching hundreds of in-person and online viewers.
- Delivered high-quality design revisions under tight deadlines in response to leadership feedback.

Graphics Designer & IT Support Personnel

Floryville Christian School - Jos, Plateau State

January 2021 – August 2025

- Designed flyers, banners, certificates, and newsletters for academic events, promotions, and official communications.
- Ensured brand consistency across all digital and print materials used by the institution.

- Provided technical support for computer systems, printers, projectors, and network infrastructure.
- Trained staff on computer usage, Microsoft Office tools, and safe internet practices.
- Managed and maintained digital classroom resources and supported multimedia presentations for academic delivery.

EDUCATION

Bachelor of Technology (B.Tech) — In Progress
Nigerian University of Technology and Management (NUTM)
Lagos, Nigeria

2024 – 2028

West African Senior School Certificate (WASSCE)
Floryville Christian Schools | Jos, Plateau State

2019 – 2024

SKILLS

TECHNICAL SKILLS

Front-End Development <i>HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Shadcn/UI, Radix UI</i>	Back-End Development <i>Node.js, Supabase (PostgreSQL + KV), Hono (Deno Edge Functions), REST APIs</i>
Programming Languages <i>Python, R, C++, Java</i>	AI & Automation <i>AI API Integration, Workflow Automation, Prompt Engineering, AI-Assisted Content Production</i>
Design Tools <i>Adobe Illustrator, Adobe Photoshop, CorelDRAW, Canva, Figma</i>	Cloud & Deployment <i>Vercel, GitHub, Google Cloud Tools</i>
Office & Productivity <i>Microsoft Word, Excel, PowerPoint, Access, Google Workspace</i>	Media Production <i>Motion Graphics, Livestream Visuals, Broadcast Asset Management, Social Media Strategy</i>

CORE COMPETENCIES

Creative Design & Branding Visual identity, brand guidelines, print & digital assets, UI/UX design	Full-Stack Web Development End-to-end product development from wireframe to deployment
AI-Driven Digital Solutions Building AI-integrated tools, SaaS platforms, and automation pipelines	Social Media & Digital Strategy Content calendars, cross-platform management, growth strategy
Computer Operations Training IT support, staff upskilling, MS Office, safe internet practices	Product Thinking User-centred design, technical problem-solving, scalable architecture

SOFT SKILLS

- Creativity & Problem-Solving
- Team Collaboration
- Public Speaking
- Attention to Detail
- Customer Orientation
- Adaptability

CERTIFICATIONS

- Microsoft Azure AI Engineer Associate (AI-102) — Digital Skills Nigeria (June 2026)
- AWS AI Practitioner Challenge — Udacity (June 2026)
- Understanding Artificial Intelligence — DataCamp (June 2026)
- AI Basics (01) — Digital Skills Nigeria (June 2026)
- Microsoft / Digital Skills Nigeria — AI Developers Programme (2025)
- Federal Government of Nigeria (NITDA) — 3MTT Software Development Programme (2025)
- Professional Graphics Design Certification
- Certified Full-Stack Web & Software Developer

PROJECT PORTFOLIO

Smarthub Agrochain — Decentralised agri-tech marketplace built to bridge the gap between farmers, investors, and consumers — featuring role-based product listings, secure user authentication, and a real-time operational dashboard. Designed and deployed end-to-end.

Tech: Next.js, React, Tailwind CSS, TypeScript

Link: <https://smarthub-agronexus.vercel.app/>

CareMandate AI – Healthcare Care Operations Platform

Enterprise-grade SaaS platform for healthcare providers featuring intelligent scheduling, visit tracking, staff management, and compliance tooling.

Tech: Next.js, Tailwind, Typescript, Reacts

Link: <https://care-mandate-ai.vercel.app>

Prepify AI – Smart Student Academic Command Centre

AI-powered academic productivity tool designed to help students manage study workflows, resources, and learning goals efficiently.

Tech: Next.js, Tailwind, APIs

Link: <https://app-ba1qsiqmh7up.appmedo.com/>

Footprints Energy – Natural Products & Commodity Trade Website

Professional business website for a natural commodities brand, featuring product listings, team profiles, and brand storytelling.

Tech: Next.js, React, Tailwind, TypeScript

Link: <https://foodprints-energy.vercel.app/>

TransLexa AI – Real-Time AI Translation Engine

AI-powered multilingual translation tool supporting text input, TXT file uploads, translation history, and downloadable output.

Tech: HTML, CSS, JavaScript, AI APIs

Link: <https://trans-lexa-ai.vercel.app/>

LANGUAGES

- **English** — Proficient (oral & written)
- **Multiple Nigerian Dialects** — Conversational

INTERESTS & HOBBIES

- Software Engineering Research
- Graphics & Digital Art
- Artificial Intelligence
- Football
- Weightlifting
- Science & Technology Research
